

## **BOSCH TO COVER ALL BASES FOR BUILDING SERVICES INDUSTRY AT M&E 2011**

August 2011

Bosch Security Systems is set to showcase its expertise at M&E - The Building Services Event, held at Olympia London on 11-12<sup>th</sup> October, by presenting a broad range of proven communications, surveillance and recording technologies.

The leading security and voice evacuation systems provider will demonstrate a range of products, systems and innovations, already proven in a variety of demanding installations. These will include its Praesideo Public Address/Voice Alarm (PA/VA) technology and a selection of digital CCTV cameras and FlexiDome systems incorporating its high definition (HD) camera portfolio.

Paul Wong, Managing Director of Bosch Security Systems, says that Bosch is committed to developing security and safety solutions that are tailored to meet the demands of many different environments: “M&E – The Building Services event, with its high profile backing from CIBSE, ECA, and HVAC, is an ideal opportunity for us to demonstrate our well-proven security and communications technology to consultants, contractors and end users.”

Bosch’s Praesideo is the world’s first fully digital (PA/VA) system, tested and approved to the new European Standard (EN54). With over 5,000 systems installed worldwide, it is the proven solution for essential public address and emergency voice evacuation needs: “The

quality and reliability of Praesideo has set the benchmark for the evacuation market from the time that it was introduced, and it is easy to see how beneficial it could prove in just about any built environment,” Paul says.

The Dinion series is a range of high definition cameras that deliver exceptional clarity in surveillance. The range features both analogue and digital IP technologies, and both fixed-body cameras and FlexiDome systems, and is compatible with all existing CCTV systems. According to Paul: “The Dinion technology offers superior performance to match your application and budget.”
