

## Bosch Launches New Easy Series AutoDome Easy II For Discreet Applications

April 2010

Bosch Security Systems has enhanced its AutoDome range of sophisticated CCTV domes with the launch of the AutoDome Easy II – an affordable, easy to install PTZ camera system incorporating many features more typically associated with higher-end dome camera technologies.

From an installer perspective, intuitive set-up menus make the dome configuration quick and easy according to Dave Mulcahy, CCTV Products Manager: “Built-in IntuiKey support means that the new Easy II uses the same familiar keyboard and joystick commands as the rest of the Bosch AutoDome family,” he says, “as well as supporting Pelco P and D protocols.”

In terms of the end-user, the AutoDome Easy II is approximately 70% smaller than traditional PTZ cameras and 20% smaller than other compact domes, says Dave: “This makes it ideal for scenarios where discrete surveillance is required,” he says, “but where the customer cannot compromise on performance.”

Despite its compact design, the new dome provides variable pan and tilt speeds and an autopivot function to ensure optimum camera control and viewing at all zoom levels. The high performance 120x (10x optical/12x digital) zoom autofocus camera incorporates the latest digital imaging technology with excellent sensitivity and resolution. “It has no fewer than 99 user-defined pre-sets,” Dave adds, “as well as multiple tour and autopan modes.”

A single AutoDome Easy II provides as much coverage as four fixed mini domes and is priced lower than traditional PTZ dome cameras, Dave continues: “Investment is also protected because AutoDome Easy II easily integrates with the entire range of Bosch surveillance products including Allegiant matrix switchers, DiBos and Divar digital recorders, and the VIDOS IP-based video management system when used with a Bosch encoder.”

They have also been robustly tested as Dave concludes: “As with all of our products, the AutoDome Easy II has been subjected to the industry’s most comprehensive and demanding tests of endurance,” he says. “This includes highly accelerated life testing (HALT) to ensure its reliability for many years to come.”

*The Bosch Group is a leading global supplier of technology and services. In the areas of automotive and industrial technology, consumer goods, and building technology, some 275,000 associates generated sales of 38.2 billion euros in fiscal 2009. The Bosch Group comprises Robert Bosch GmbH and its more than 300 subsidiaries and regional companies in over 60 countries. If its sales and service partners are included, then Bosch is represented in roughly 150 countries. This worldwide development, manufacturing, and sales network is the foundation for growth. Each year, Bosch spends more than 3.5 billion euros for research and development, and applies for some 3,800 patents worldwide. With all its products and services, Bosch enhances the quality of life by providing solutions which are both innovative and beneficial.*

*The company was set up in Stuttgart in 1886 by Robert Bosch (1861–1942) as “Workshop for Precision Mechanics and Electrical Engineering.” The special ownership structure of Robert Bosch GmbH guarantees the entrepreneurial freedom of the Bosch Group, making it possible for the company to plan over the long term and to undertake significant up-front investments in the safeguarding of its future. Ninety-two percent of the share capital of Robert Bosch GmbH is held by Robert Bosch Stiftung GmbH, a charitable foundation. The majority of voting rights are held by Robert Bosch Industrietreuhand KG, an industrial trust. The entrepreneurial ownership functions are carried out by the trust. The remaining shares are held by the Bosch family and by Robert Bosch GmbH.*
