End User:

Pravets Golf & SPA Resort

The hotel "Pravets Golf & SPA Resort" is a luxury resort including a hotel, bungalows, and a golf course. It offers all features and services to cover the requirements from the most demanding guests from all over the world. This multi-purpose complex is suitable for seminars, meetings and conferences, and it is an excellent resort for relaxing vacations.

Business Objective:

The major objective was to implement security systems that meet the high-standard safety requirements of the facility. At the same time they must provide flexible and decentralized operations which depend on the specific purpose of each area in the hotel.

Solution:

Telelink, one of Bosch's partners in Bulgaria, implemented Bosch Security Systems' products in order to meet the high customer requirements and to offer flexible solutions.

In the Pravets Golf & SPA Resort a Fire Alarm, a Public Address, and a Video Surveillance system were installed.

Fire Alarm: Bosch fire detectors and a third party fire alarm system were fully integrated with the room-management system. Over 1000 detectors from the 320 range were installed.

Public Address: The effectiveness of Bosch Public Address systems was of significant importance for the success of the project. Bosch PLENA sound system was fully integrated with the other systems. PLENA defined the different zones with separate functionality and control. In case of emergencies, the central management controls all areas and becomes the master public address station which takes care of all hotel customers' safety. Verbal instructions are announced in case of threats.

Pravets Golf & SPA Resort Bulgaria

Video Surveillance: In order to offer full security to all guests and employees in a facility that is opened 24/7 it became indispensable to install a reliable and flexible video-surveillance system. Telelink implemented DiBos platform combining 32 analog and IP-based cameras – 6 AutoDome PTZ and 26 WZ fixed cameras. The coverage of the most critical areas was a major concern. A separate remote security monitoring room was set up for all surveillance activities.

Result:

Due to Bosch's excellent price-performance ratio, all systems fully met the project budget. The technical parameters satisfied the customer's expectations for high reliability and flexibility. The 3-year warranty brings additional value to the client. The Bosch integrated security systems turned the Pravets Golf & SPA Resort into a safe resort where customers can fully enjoy their stay.
