

BOSCH CAMERAS PUT IN THE DOCK!!

The latest EnviroDome cameras from Bosch Security Systems have been specified by Unique Integrated Systems (UIS) in an important new installation at the historic Albert Dock, Liverpool – described as the most visited multi-user attraction outside of London, attracting more than four million people each year. Security at the UNESCO World Heritage site is a high Priority.

Skelmersdale-based UIS in partnership with CB Richard Ellis, managing agents for The Albert Dock, have continually reviewed and enhanced the CCTV technology and has been commended by Merseyside Police as the best installation in the City.

UIS recommended Bosch and the result is a new 14-camera installation and 32-way matrix system, as Operations Director Mark Ashall explains:

“The existing cameras were Bosch and the client Gower Street Estates is pleased with their performance,” he explains. “It made sense, therefore, to explore what else Bosch had to offer, and for this new project the EnviroDome seemed to be the ideal choice.

“We had to bear in mind that this is a World Heritage Site and the buildings are Grade I listed, so we had to take into account the management’s concerns about aesthetics. Of equal importance was the issue of reliability. We want cameras that need only the minimum of maintenance, and know that they won’t fail when they are needed most.”

EnviroDomes are an integral part of Bosch’s AutoDome range, featuring its innovative motion tracking capability AutoTrack. Rugged in design and ideally suited for perimeter surveillance, car parks and other similar outdoor applications, EnviroDomes feature Day/night cameras that automatically switch from colour to monochrome when light levels decrease to give extra sensitivity, whilst high-resolution cameras with optical zoom of up to 25x capture the finest detail.

“The Client has been very pleased with the new technology,” Mark adds. “It has taken their security to a new level, whilst not interfering with the intrinsic quality of such an historic site.”

Completed in 1846, the docks were designed to accommodate 1,000 tonne sailing ships carrying valuable cargo of rum, tobacco and cotton. It now houses a mixture of award-winning museums like Tate Liverpool and the Beatles Story to a variety of different restaurants and bars.

The Bosch Group is a leading global supplier of technology and services. In the areas of automotive and industrial technology, consumer goods, and building technology, some 271,000 associates generated sales of 46.3 billion euros in fiscal 2007. The Bosch Group comprises Robert Bosch GmbH and its more than 300 subsidiaries and regional companies in roughly 50 countries. This worldwide development, manufacturing, and sales network is the foundation for further growth. Each year, Bosch spends more than 3 billion euros for research and development, and applies for over 3,000 patents worldwide. The company was set up in Stuttgart in 1886 by Robert Bosch (1861-1942) as “Workshop for Precision Mechanics and Electrical Engineering.”

The special ownership structure of Robert Bosch GmbH guarantees the entrepreneurial freedom of the Bosch Group, making it possible for the company to plan over the long term and to undertake significant up-front investments in the safeguarding of its future. Ninety-two percent of the share capital of Robert Bosch GmbH is held by Robert Bosch Stiftung GmbH, a charitable foundation. The majority of voting rights are held by Robert Bosch Industrietreuhand KG, an industrial trust. The entrepreneurial ownership functions are carried out by the trust. The remaining shares are held by the Bosch family and by Robert Bosch GmbH.
