

Bosch's New IP Networking Course Gains CPD Certification

December 2010

The Bosch Security Academy has achieved Continuing Professional Development (CPD) certification for its IP Networking course.

The course, specifically designed with installers, project managers and support staff in mind, is a good starting point for engineers who are new to CCTV IP and want to develop a better understanding of the basics of networking.

The course, delivered over a day, covers all the relevant topics required to install and configure network devices, including connectivity devices, the fundamentals of TCP/IP, IP addressing and network attached storage. The course also provides an introduction to Bosch video over IP devices.

Adam Breeze of Bosch Security Systems says that achieving CPD status demonstrates the company's commitment to delivering courses that have real relevance and value to professionals working with Bosch products: "We hope to see other courses achieve the certification in the near future including our training course for Imaging and IR."

The next training session will be held on Thursday 9th December 2010. For more information or to book your place please email security.training@uk.bosch.com.

Additional information on Bosch Security Systems and Bosch Group is available at

www.boschsecurity.co.uk

The Bosch Group is a leading global supplier of technology and services. In the areas of automotive and industrial technology, consumer goods, and building technology, some 275,000 associates generated sales of 38.2 billion euros in fiscal 2009. The Bosch Group comprises Robert Bosch GmbH and its more than 300 subsidiaries and regional companies in over 60 countries. If its sales and service partners are included, then Bosch is represented in roughly 150 countries. This worldwide development, manufacturing, and sales network is the foundation for growth. Each year, Bosch spends more than 3.5 billion euros for research and development, and applies for some 3,800 patents worldwide. With all its products and services, Bosch enhances the quality of life by providing solutions which are both innovative and beneficial.

The company was set up in Stuttgart in 1886 by Robert Bosch (1861–1942) as “Workshop for Precision Mechanics and Electrical Engineering.” The special ownership structure of Robert Bosch GmbH guarantees the entrepreneurial freedom of the Bosch Group, making it possible for the company to plan over the long term and to undertake significant up-front investments in the safeguarding of its future. Ninety-two percent of the share capital of Robert Bosch GmbH is held by Robert Bosch Stiftung GmbH, a charitable foundation. The majority of voting rights are held by Robert Bosch Industrietreuhand KG, an industrial trust. The entrepreneurial ownership functions are carried out by the trust. The remaining shares are held by the Bosch family and by Robert Bosch GmbH.
