

Bosch wins CCTV Product of the Year at PSI Premier Awards

June 2010

Bosch Security Systems has won the PSI Premier Award for CCTV Product of the Year 2010 for its Dinion 2X range.

The Dinion 2X range enhances an already proven camera technology with improved processing and advanced level imaging. Its performance is designed for the most demanding surveillance applications, and its features have been tailored to make the installer's job easier.

Collecting the award at PSI Premier Awards ceremony in June, Paul Wong said that the achievement built on the company's reputation for the quality and reliability of its security products: "PSI's Premier awards are like no other," he says, "because they are voted for by the people that count, and the people that really understand our quality proposition."

The cameras within the Dinion 2X range combine a proprietary wide dynamic range CCD sensor (Charged Coupled Device) with a new Bosch designed 20-bit digital signal processor (DSP) with many times the computational power of conventional cameras. These innovative features deliver superior performance with improved detail reproduction and better image quality in low-light conditions.

With Bosch's new smart surveillance technology, the Dinion 2X cameras are well suited for applications involving difficult lighting, day/night surveillance or where the most detailed images are required. Examples include outdoor perimeters, traffic monitoring, tunnels, car parks, and casinos and gaming centers.

The Bosch Group is a leading global supplier of technology and services. According to preliminary figures, some 270,000 associates generated sales of roughly 38 billion euros in the areas of automotive and industrial technology, consumer goods, and building technology in fiscal 2009. The Bosch Group comprises Robert Bosch GmbH and its more than 300 subsidiaries and regional companies in over 60 countries. If its sales and service partners are included, then Bosch is represented in roughly 150 countries. This worldwide development, manufacturing, and sales network is the foundation for further growth. Each year, Bosch spends more than 3.5 billion euros for research and development, and applies for over 3,000 patents worldwide. With all its products and services, Bosch enhances the quality of life by providing solutions which are both innovative and beneficial.

The company was set up in Stuttgart in 1886 by Robert Bosch (1861-1942) as "Workshop for Precision Mechanics and Electrical Engineering." The special ownership structure of Robert Bosch GmbH guarantees the entrepreneurial freedom of the Bosch Group, making it possible for the company to plan over the long term and to undertake significant up-front investments in the safeguarding of its future. Ninety-two percent of the share capital of Robert Bosch GmbH is held by Robert Bosch Stiftung GmbH, a charitable foundation. The majority of voting rights are held by Robert Bosch Industrietreuhand KG, an industrial trust. The entrepreneurial ownership functions are carried out by the trust. The remaining shares are held by the Bosch family and by Robert Bosch GmbH.
