

BOSCH EXTENDS EASY LINE RANGE TO PUBLIC ADDRESS SYSTEM

July 08

Bosch Security Systems has extended its proven range of Plena public address and voice alarm technology with its new Easy Line series, specifically developed for the most demanding public address and background music applications.

The new Easy Line series includes two-and one-zone mixers amplifiers, a mixer unit, new power amplifiers, an 'all-call' call station, a two-zone call station and a wall panel.

“With these latest extensions to the Plena Public Address System, Bosch is able to offer fully-featured public address and voice alarm solutions for cost-sensitive markets such as small retail and leisure applications, office buildings, light industry and public sector environments including schools,” says Paul Wong, Managing Director of Bosch Security Systems.

The two-zone mixer amplifier is available in 120W and 240W versions and features 10 inputs to provide a variety of solutions for broadcasting announcements and music to listeners. Designed to be used 'straight-out-of-the-box', it also features a new highly user-friendly interface.

A variety of back panel connection points allow for true system integration and application flexibility. The mixer section has separate internal equalizers for music inputs and a selectable line output for master or music only. Ideal for the general user, it is easy to use thanks to its straightforward interface, which includes 'recommended' setting indicators.

“Combined with one or more Plena amplifiers, this mixer unit gives users total freedom to create zones with high power needs and install additional amplifiers outside the control location,” Paul adds.

The new power amplifiers provide extra power for any Plena system application. Both units feature sturdy compact housings and temperature-controlled forced front-to-back ventilation for stackable installation.

The 'all-call' call station is a practical, user-friendly call station for all zones as well as two-zone announcements. It is provided with toggle key selection and a press-to-talk feature. The two-zone call station is a more advanced unit with two zones and seven built-in chimes. Up to six call stations can be linked to the system, making the system expandable as demands dictate.

The Bosch Group is a leading global supplier of technology and services. In the areas of automotive and industrial technology, consumer goods, and building technology, some 271,000 associates generated sales of 46.3 billion euros in fiscal 2007. The Bosch Group comprises Robert Bosch GmbH and its more than 300 subsidiaries and regional companies in roughly 50 countries. This worldwide development, manufacturing, and sales network is the foundation for further growth. Each year, Bosch spends more than 3 billion euros for research and development, and applies for over 3,000 patents worldwide. The company was set up in Stuttgart in 1886 by Robert Bosch (1861-1942) as "Workshop for Precision Mechanics and Electrical Engineering."

The special ownership structure of Robert Bosch GmbH guarantees the entrepreneurial freedom of the Bosch Group, making it possible for the company to plan over the long term and to undertake significant up-front investments in the safeguarding of its future. Ninety-two percent of the share capital of Robert Bosch GmbH is held by Robert Bosch Stiftung GmbH, a charitable foundation. The majority of voting rights are held by Robert Bosch Industrietreuhand KG, an industrial trust. The entrepreneurial ownership functions are carried out by the trust. The remaining shares are held by the Bosch family and by Robert Bosch GmbH.
