

# Prince of Songkla University International Conference Center (PSUICC)

**BOSCH**

Invented for life

## Industry:

Commercial and Government Buildings

## End User:

**Prince of Songkla University International Conference Center** was established in commemoration of the 60th anniversary of His Majesty King Bhumibol Adulyadej's accession to the throne. Prince of Songkla University International Convention Center is Thailand's newest convention center in this vein and the largest in the country's southern region. It is situated within the Hatyai campus of Prince of Songkla University and located just nine kilometers from Hatyai International Airport. The conventional center is also in close proximity to the full spectrum of modern amenities and features splendid southern-style architecture.

Prince of Songkla University International Convention Center is equipped with state-of-the-art multi-media technology. Thus, this excellent convention center is the pride of the south.

## Business Objective:

The southern star convention center provides an international-scale convention center which is capable of hosting the full range of leading-edge local and international events. Hence, high quality as well as technology products including outstanding security and communication systems were required to be installed within the center.

## Solution:

In conjunction with the Bosch partner Libra Network and Security Co., Ltd. the persons in charge of the PSUICC decided to rely on Bosch Security & Communication Systems. Thus, CCTV, Congress and Prosound systems were installed around the center.

The purpose of the CCTV system is to observe, recognize and identify everybody sojourning in the area. Therefore, recorded images are relayed to the control room, where they are finally shown on the video wall for the people who are in charge of the technology. The system provides a complete overview of what is going on in the center with the help of 19 Dinion IP-cameras, 27 Dome cameras as well as 47 other cameras which are supported by 2 DiBos digital video recorders and 2 AutoDome controllers. Moreover, it makes possible to zoom in on specific situations or areas in order to discuss what measures should be taken.

Full control of meetings and discussions without being dependent on any operator is provided by DCN wireless systems consisting of 8 Basic Central Control Units, 80 Contentus Basic Units as well as 8 Contentus Chairman Units in every conference room. The system can be easily extended and provides ease of use for every of its various functions, its unique features as well as its state-of-the-art system.

With the help of Electro Voice (EV) Prosound systems the ideal solution for each required situation is provided. Thus, PSUICC could benefit from EV's technical expertise and long years of experience in this area yielding a product portfolio that is at the same time comprehensive and of uniform excellence.

## Result:

PSUICC is very pleased with the benefits of this flexible and easy-to-use conference and CCTV system. Hence, it helps a lot to facilitate the numerous meetings taking place in the center nowadays.

Once more PSUICC trusted in Bosch's high quality products, its experience and competence. Thanks to the reliability of the products and the excellent work of the Bosch dealer Libra Network and Security Co., Ltd..
