

## Bosch announces 2008 Technology Day schedule

November 2008

Following the successful integration of Bosch Security Systems and the Extreme CCTV Group, a winter schedule of Technology Days has been announced, which this year has been extended to incorporate more locations across the country.

These Bosch Technology Days, targeted at security consultants, installers and end users, are a development of the Bosch Camera Shootouts. However, this year Bosch will be demonstrating the capabilities of its extended range of products, from CCTV cameras to infrared and white light security, along with focusing on the full potential of integrated solutions that Bosch now offers. The schedule is as follows:

17th November – London Zoo  
20th November – Celtic Manor, Cardiff  
24th November – St John's Hotel, Solihull  
27th November – Walton Hall Golf Club, Warrington  
2nd December – Curraheen Park Greyhound Racing, Cork, Ireland  
4th December – Camac Valley, Dublin, Ireland

Commenting on the Technology Days, Paul Wong, Managing Director of Bosch Security Systems said: "The locations for each event have been carefully selected to offer the ideal environment and with light levels dropping as early as 4pm the technology will be thoroughly tested."

The Bosch Technology Days will be complementing the Derwent's Dark Nights campaign, which is highlighting the importance of illumination and the importance of reviewing the effectiveness of security systems at night.

*The Bosch Group is a leading global supplier of technology and services. In the areas of automotive and industrial technology, consumer goods, and building technology, some 271,000 associates generated sales of 46.3 billion euros in fiscal 2007. The Bosch Group comprises Robert Bosch GmbH and its more than 300 subsidiaries and regional companies in roughly 50 countries. This worldwide development, manufacturing, and sales network is the foundation for further growth. Each year, Bosch spends more than 3 billion euros for research and development, and applies for over 3,000 patents worldwide. The company was set up in Stuttgart in 1886 by Robert Bosch (1861-1942) as "Workshop for Precision Mechanics and Electrical Engineering."*
